Oglala Lakota College Technology Plan

2018 to 2023

Technology Plan 2018-2023

(Draft)

A. Introduction

This Technology Plan for Oglala Lakota College is meant to align with the OLC Strategic Plan. The goal of the Technology Plan is to provide a framework for meeting the technology needs of the stakeholders of Oglala Lakota College. The Technology Plan was developed with input from the Technology Committee, the Technology Director, the Distance Learning Coordinator and the Vice-President for Business. An executive summary of the technology needs assessment and the network evaluation is attached. The raw data from these documents is on file with the Assessment Director.

B. History of Technology at Oglala Lakota College

Oglala Lakota College has historically been an innovator in the use of instructional technology. OLC acquired personal computers in the early 1980s which were used with small LANs for instruction in word processing, databases and spreadsheets. In the early 1990s internet access was provided through dial-up connections and a 56k line to SDSM&T. In 1995 the BIA provided a T-1 for internet access. A VAX/VMS student management system was used in the 1990s which was later replaced with the Jenzabar system we use today. OLC's WAN was first utilized for videoconferencing in 1996 when T-1s were installed at Pejuta Haka and Pine Ridge. During the 21st century, OLC rapidly expanded its online presence with content management servers, blogging, a wiki, audio and video streaming as well as content filtering.

An institutional technology plan was first developed at Oglala Lakota College during the 2003-04 academic year. This plan and its successors provide the framework for numerous important activities involving computer and communications technologies. Technology resources, including hardware, software, networks, and support staff, have assumed increasingly important roles in the higher education enterprise. Given the rapidly changing nature of the technology environment, it is critical that institutional technology planning be strategic. Toward this end, a college technology planning committee was formed during the 2002-03 academic year.

The process is continually refined. This may involve, but is not necessarily limited to: reviewing progress toward existing Plan goals; modifying, deleting, or adding goals as necessary; identifying responsibility for particular plan activities; suggesting timelines for the completion of activities; recommending funding priorities to the Vice President for Instruction and the Vice-President for Business, and the Institutional Development and Instructional Affairs committees on matters related to instructional technology. Its' charge is to foster innovation and promote appropriate use of technology

2018 to 2023

for the entire Institution. The Technology Committee together with the department of Technology Support Services (TSS) provides the entire Institution with the apparatus necessary for good analysis and decision making.

For the current (2018-23) planning cycle, Technology Committee members decided to address specific needs voiced by the students and staff of Oglala Lakota College. The technology needs assessment enabled the committee to identify and focus on the more significant issues, in an effort to better set the College direction in these important areas. Additionally, an external consultant is being retained for the purpose of a network evaluation. Many of their recommendations will be implemented through this planning process.

C. Current and Future Initiatives

Funding sources used for technology initiatives include Technology Fees, Title III funds. Initiatives are completed in the order of need as determined by the Technology Committee and the Administration and the Board of Trustees.

Current initiatives as of the summer of 2017 are:

- Maintenance of computer labs.

- Update laptop carts.

- Increase Internet bandwidth at Pejuta Haka, Pine Ridge and Pahin Sinte college centers to 25 MBps.

- Develop, Install, Configure Mobile Application for SMS.

- Redesign/Rebuild, remove Flash, accelerate website with a new theme (expected completion 1/18).

Future initiatives include:

- Continue with scheduled 5-year hardware replacement.

- Re-cable 2nd floor Piya Wiconi Building to Category 6 specification.

- Re-cable Pine Ridge College Center to Category 5e specification.

- Increase internet bandwidth at various locations.

- Acquire unlimited data 4g LTE AT&T hotspot for East Wakpamni College Center.

- Continue seeking institutional consensus for migration to Google Suite for Education / gmail.

- Install Video Surveillance systems in college centers.

- Continue student laptop purchase program.

2018 to 2023

Technology Needs Assessment Executive Summary

In the spring of 2017, a technology needs assessment was conducted at Oglala Lakota College. Students and staff were asked to respond to a web-based survey. The staff and students overall are fairly well satisfied with existing technology solutions although frustrations with slow internet were expressed and are being addressed.
